NOTES AND STATISTICS

ON

HOSPITALS AND DISPENSARIES IN BURMA

FOR THE YEAR 1918.

1. The charge of the office of the Inspector-General of Civil Hospitals, Burma, continued to be held by me throughout the year 1918.

2. On the 31st December 1918, the total number of hospitals and dispensaries in the province was 262 as contrasted with 274 on the corresponding day in 1917. During the year under report, three, *viz.* (1) the Ellen Mitchell's Hospital for women, (2) the Civil and (3) the Military Police, Hospitals at Mawlaik, and two dispensaries for Forest and Survey purposes and the Civil Dispensary, Laza, Putao District, six in all, were opened, while no fewer than 18 institutions were closed, chiefly owing to the temporary transfer to military duty of Sub-Assistant Surgeons. It is hoped that several of these will be re-opened immediately after the return of subordinates from military duties. Statement A.

3. The aggregate number of patients treated at State public, local fund, and private-aided institutions was 1,851,903 as against 1,867,529 in 1917 showing a fall of 15,626. Of the aggregate number treated during the year 75,793 were in-patients and 1,776,110 out-patients as compared with 69,403 and 1,798,126 respectively in the preceding year. Statement B.

Of the in-door patients treated during the year 54,238 or 71.56 per cent. were cured, 7,134 or 9.4 per cent. were relieved, 5,769 or 7.61 per cent were discharged otherwise and 5,779 died resulting in a case mortality of 7.62 per cent. of the total number treated as against 5.77 in 1917. The higher percentage of case mortality may be attributed to the fatal results of Influenza returned under "All other infective diseases" and "Pneumonia". The total number of beds available at hospitals during 1918 was 3,788 for males and 1,209 for females or an increase of (18 for males and 32 for females) 50 beds over the number returned for the previous year. A decrease of 22,016 has occurred in the out-door attendance of the year 1918 as compared with that of 1917. The daily average attendance has also fallen from 9,639 in 1917 to 9,528 in the year under report. Taking institutions individually, the average daily attendance exceeded one hundred at Rangoon, (468) Kemmendine, (138) Gyobingauk, (135) Sagaing, (133) Bhamo, (131) Maymyo, (127) Mandalay, (121) Myitkyina, (120) Bassein and Toungoo (101) each. The percentage of patients represented by friends has shown a slight decrease from 16.58 in 1917 to 16.23 in the year under report.

4. The chief diseases treated in the order of greatest prevalence were "all other diseases of the digestive system" (406,048), "Malaria" (235,462), "All other diseases of the respiratory system except Pneumonia and Tubercle of the Lungs" (154,559), "Ulcers" (145,918), "Diseases of the Skin" (139,230), "Injuries (general and local)" (125,150), "Disease of the Eye" (105,172), "Dyspepsia" (81,788), "Diseases of the Ear" (47,216), "All other infective diseases" (47,034), "Diseases of the connective tissue" (39,357), "Rheumatic fever and Rheumatism" (35,433), Pyrexia of uncertain origin (30,920), "Diarrhœa" (29,846) and "Diseases of the Nervous System" (28,443). During the year under report 752 cases of Cholera, 1,461 of Plague and 369 cases of Small-pox were also treated at hospitals while the corresponding figures of the year previous under these infective diseases were 347 and 1,013 and 435 cases respectively. There were 5,779 deaths among in-door patients treated during the year 1918. These deaths were distributed chiefly among "All other infective diseases" 1,153, "Pneumonia" 593, "Injuries (general and local)" 489, "Plague" 473, "Tubercle of the Lungs" 343, "Malaria" 298, "Dysentery" 293, "Diarrhœa" 232, "Anæmia" 223, "All other diseases of the Digestive system" 197, "All other diseases of the Nervous system" 124. The percentages of deaths to admissions under these diseases during the year stated for purposes of contrast with those of the year previous are: "Plague" 62.24 against 59.69; "Tubercle of the Lungs" 38.63; against 34.44; "Pneumonia" 35.89 against 31.82; "Diseases of the circulatory system" 25.05 against 19.8; "Diarrhœa" 18.21 against 18.38, "Anæmia" 18.01 against 16.44; "All other infectious diseases" Statement C (i) and C (ii).

16.13 against 14.64; "Dysentery" 13.29 against 13.89; "Diseases of the Nervous system" 12.39 against 12.38; "All other diseases of the Digestive system" 7.59 against 6.78; "Injuries (general and local)" 3.38 against 3.24; "Malaria" 2.58 against 2.51.

Statement
D(i) and
D(ii).

5. *Military Police Hospitals*.—Of the total number of patients treated in Military Police Hospitals during the year, *viz.*, 20,923 (20,487 Police *plus* 436 Civil) were in-door patients and 102,668 (89,664 Police *plus* 13,004 Civil) out-door against 16,008 and 94,787 respectively in 1917.

"Malaria" was responsible for the largest number of cases, *viz.*, 29,309, and "All other diseases of the respiratory system except Pneumonia and Tubercle of the Lungs" with 16,068 cases comes next followed closely by "All other diseases of the Digestive system" which contributed 13,935. The diseases next in order of prevalence were "Ulcers" 8,987, "Injuries (general and local)" 7,948, Dyspepsia 6,215, All other infective diseases 5,520, and diseases of the skin 5,064. Out of 362 deaths among the in-patients treated, 150 were from "All other infective diseases," 57 from Pneumonia, 38 from "All diseases of the respiratory system except Pneumonia and Tubercle of the Lungs," and 34 from "Malaria."

6. *Railway Hospitals and Dispensaries*.—The total number of patients treated at the Railway Medical Institutions increased from 113,579 in 1917 to 119,815 in the year under report. This marked increase was chiefly contributed by the out-patients whose number rose from 112,460 in 1917 to 118,442 during the year under report. The largest number of cases treated as in-door was for "Injuries (general and local)" 326, "Malaria" 201, and "All other diseases of the respiratory system except Pneumonia and Tubercle of the Lungs" 102. The largest number of deaths among in-patients was under "Pneumonia" 20 and under "Injuries" 10. "All other diseases of the Digestive system" contributed 20,576 towards the number of cases treated out-door, and next in order come "Malaria" and "All other diseases of the Respiratory system except Pneumonia and Tubercle of the Lungs" which account for 17,069 and 14,694 respectively.

Statement
F.

7. The aggregate attendance by classes during the year when contrasted with that of the preceding year resulted in a net decrease of 15,626. Hindus and Burmans, however, showed a marked increase of 10,583 and 42,750 respectively, but the large decline of 68,032 under "others" and 1,745 under Mahomedans more than counterbalance these results. According to sexes the attendance of females of all Asiatic classes was poor though it is somewhat encouraging in the case of Burmese women who have perhaps begun to evince an appreciable measure of confidence in western methods of treatment.

Statement
G.

8. During the year, 51,608 operations were performed on 50,814 patients while the figures for the previous year were 56,148 and 55,655 respectively. The death rate per mille among the patients operated on fell from 6.3 in 1917 to 5.1 in the year under report. In the Rangoon General Hospital 280 abdominal and 124 gynaecological operations were performed and the death-rates attending these operations were 12 and 9 per cent. respectively.

Statements
H. & J.

9. The year under report opened with a balance of Rs. 75,062 against Rs. 85,003 in 1917. Under receipts, Government subsidies increased from Rs. 8,95,485 in 1917 to Rs. 9,57,965 in 1918, and the grants from Local Funds including Municipalities decreased from Rs. 10,02,491 in 1917 to Rs. 9,38,195 in 1918. Subscriptions and donations received from the public during the year under report increased from Rs. 59,761 in 1917 to Rs. 65,024 in 1918. This total excludes miscellaneous receipts under which there has been an increase of Rs. 12,842 during the year under report. There has been an increase of only Rs. 6,723 under receipts during the year 1918. The total expenditure on hospitals and dispensaries during the year under review amounted to Rs. 20,18,227 as against Rs. 20,09,847 in 1917. A sum of Rs. 9,710 was invested during the year under report and thus the year closed with a balance of Rs. 73,440 against Rs. 75,062 in 1917.

10. *Donations*.—It is gratifying to be able to record the following donations to the various Hospitals and Dispensaries in the province. A fairly decent *zayat*, built by U Po at a cost of Rs. 937 was handed over to the Taungup Hospital Committee, Sandoway District, for use of relatives and friends of in-patients. A philanthropic offer of Rs. 2,500 was made by U Po Chit, *Thugyi* of Letpanbin Village, was accepted for providing a *zayat* in the compound of the Civil Hospital Nyaunglebin while a kitchen was also built there at a cost of Rs. 762, from the

balance of money donated by U Myat Tun Aung, Nyaunglebin, in the Pegu District. A decent small glass cabinet for instruments was presented by Ko San U, trader, to the Civil Hospital, Dedaye, Pyapon District. The Burma Oil Company has contributed its very liberal support by providing financial assistance to the Civil Hospital, Syriam, up to Rs. 10,000 per annum in the present juncture and the scheme started by Mr. H. L. Allan by which the Company's Burman, Indian and Chinese employees make voluntary contributions amounted to something over Rs. 2,000; a welcome innovation. The *Sawbwa* of Kēngtūng deserves special mention for his generous contribution of Rs. 2,000 towards a fund for the extension of a ward for in-patients and for the construction of an isolation ward at the Civil Hospital, Kēngtūng. Rs. 2,000 and Rs. 1,000 were respectively contributed by the Customs Department and Messrs. British Burma Petroleum Company towards the subscription fund of the Rangoon General Hospital.

11. *Rangoon General Hospital*.—The original commissioned staff of seven officers remained reduced throughout 1918 to three, one of whom held the Superintendship of the Rangoon Central Jail as a collateral charge, while the part time services of the Director of the Pasteur Institute and of the Chemical Examiner were as far as possible utilized as Pathologist and Police Surgeon respectively with the gratifying result that the work of the hospital continued to be carried on successfully even under adverse circumstances. A slight decrease of 320 occurred in the total number of patients treated during the year while the expenditure has increased by Rs. 57,030. The former is attributable to the Municipality opening special temporary hospitals in several centres of the town apart from the General Hospital for treatment of cases of Influenza which prevailed for some months in a virulent form towards the close of the year; a wise arrangement which enabled the General Hospital staff to avoid infection as far as possible. The increased expenditure is stated to be due partly to the cost of drugs supplied during 1917 being adjusted during 1918 and to certain increases in salaries to the Nursing Staff.

The daily average attendance of in-patients, was 487 as against 465 in 1917, but that of out-patients fell from 484 to 468. The number of beds available was only 443 against a daily average of 487 in-patients; overcrowding resulted throughout the year. The opening of a special institution as an infirmary for the benefit of chronic and incurable cases would afford relief in this direction. The mortality during the year 1918 was 13 per cent. of patients treated compared with 12 per cent. in the year previous. The diseases for which treatment was chiefly sought were "Pyrexia" 3,788, "Diseases of the Eye" 3,628, "Ulcers" 3,443, "Other diseases of the Generative system" 2,781, "Syphilis" 2,133, "Rheumatic Fever" 1,670, "Anæmia" 1,641, "Malaria" 1,476, and "Diarrhœa" 1,174. The total number of operations performed during the year amounted to 6,623 showing a slight decrease of 245 when compared with the total for 1917, and the mortality rate was 1·3 per cent. as against 2 per cent. in the year previous. Ophthalmic operations showed a considerable fall, attributable to the fact that the Ophthalmic Surgeon, Rangoon, was doing part time duties as Superintendent of Jail. No less than 3,906 police cases were dealt with and 395 *post-mortem* examinations were performed at the instance of the police. The Pathological Laboratory conducted 6,377 investigations and 1,116 patients were treated in the X-Ray and Electro-Therapeutic Department and 303 X-Ray photos were taken during the year. The receipts from the paying patients under the discriminating scheme including fees for medical attendance rose from Rs. 62,225 in 1917 to Rs. 69,178 in 1918.

The laundry was in good working order throughout the year and 4,85,120 pieces of hospital clothing were washed therein at an aggregate cost of Rs. 10,999.

12. *Vaccinal Condition of Small-pox Patients*.—Out of 199 cases treated at the Contagious Diseases Hospital, Rangoon, 112 cases were vaccinated and 87 not vaccinated. Of these, 103 were vaccinated in infancy and 9 were vaccinated in adult life. Of the 112 vaccinated cases, 78 had modified, one discreet, and 33 confluent types, 12 of which ended fatally. Of 81 non-vaccinated adults treated, 22 had modified and 59 confluent small-pox of whom 25 died and of the unprotected six children, five had modified and one confluent type and all recovered. The percentage of deaths among the protected cases was 10·71 during 1918 against 2·65 in 1917, while the mortality percentage of the unprotected was 28·73 against 11·11 in the year previous. There was one case of

small-pox treated during the year at the Contagious Diseases Hospital, Mandalay, which recovered, while in Moulmein 6 protected cases were treated, successfully. Of the 22 small-pox patients treated at the Civil Hospital, Mergui, 12 were unprotected of whom 6 died. Nine bore marks of vaccination performed in childhood of whom 2 died and 1 bore marks of re-vaccination and it recovered. Of the unprotected cases, who were all adults, 50 per cent. died and of the primary vaccination 22 per cent. died.

13. *Burmese Nurses*.—In addition to the number of Anglo-Indian young women trained to fill up vacancies in its own staff of 20 probationary nurses as many as 15 Burmese and Karen Nurses were passed out fully trained from the Rangoon General Hospital in 1918. With effect from the 1st July 1918 the Local Government sanctioned the training annually of six nurses in the General Hospital, Mandalay, instead of three.

14. *Result-System Midwives*.—Eight midwife pupils successfully underwent training during the year under report in the Dufferin Hospital, Rangoon. Special instruction in the prophylactic and curative treatment of simple cases of Ophthalmia in the newborn has been added to the courses given to the Result-System midwives, and midwives already in service in the mofussil were similarly specially instructed in this important subject by Civil Surgeons and their assistants.

15. *Pasteur Institute*.—Three hundred and seventy-nine persons underwent a full course of treatment of anti-rabic treatment at the Burma Pasteur Institute, Rangoon. The patients came from 50 stations and from all classes, *viz.*—

Europeans and Anglo-Indians	...	29 males and 19 females.
Burmese	...	45 males and 33 females.
Hindus	...	151 males and 21 females.
Mahomedans	...	48 males and 7 females.
Other classes	...	18 males and 8 females.

15. *General—Indian Medical Service Officers*.—The number of appointments for officers of the Indian Medical Service was 35, of which 19 are Civil Surgeoncies, 9 are special and 4 are Jail Appointments, while the remaining 3 are for the Sanitary Department. To fill up the vacancies created by the surrender to the Military Department of most of these officers, makeshift arrangements had to be resorted to by (1) combining the duties of two or more appointments in four cases and by (2) employing:—

- (a) Private Practitioners (two),
- (b) Retired Indian Medical Service Officers (three),
- (c) A non-medical officer (one) in executive charge of a Central Jail, and
- (d) Civil Assistant Surgeons to officiate as Civil Surgeons. Nevertheless the two posts of Deputy Sanitary Commissioner had to be kept unfilled.

17. Of the sanctioned number 51 (including 4 Civil Surgeoncies) only 49 Civil Assistant Surgeons are actually on the rolls. This number does not include one superannuated Civil Assistant Surgeon whose services have been retained temporarily owing to the shortage of medical officers. The number of Civil Assistant Surgeons entertained temporarily on the roll was 23 against the cadre of 20 and two others were entertained provisionally substantive; the excess over the sanctioned number is due to the names of those entertained temporarily being retained even after they had secured temporary commissions in military service and being included in the above count. Eight were deputed to military duties and 21 others volunteered for general military service. The sanctioned number of Civil Sub-Assistant Surgeons was 380 *plus* one temporary, and the number actually on the rolls on the 31st December 1918 including 94 on military duty was 388 *plus* 8 temporary. Twenty-one of these however volunteered during the year for general military service while 8 others were deputed for military duty in India.

18. *Conclusion*.—I am glad to place on record my appreciation as to the steadfast and loyal manner in which all officers and subordinates of the department fulfilled the very arduous duties resulting from the depletion of staff on account of the great world war on the one hand and the prevalence, practically throughout the province, of a very virulent type of pandemic Influenza on the other.

P. C. H. STRICKLAND, *Colonel, I.M.S.,*
Inspector-General of Civil Hospitals, Burma.

STATEMENT A.

Showing the number of Hospitals and Dispensaries in Burma during the year 1918

(Paragraph 2).

Population of the Province, 12,115,217.

Class of dispensary.	Number open on 31st December 1917.	Number opened during the year.	Number closed during the year.	Number open on the last day of the year.	Remarks.
(1)	(2)	(3)	(4)	(5)	(6)
I.—State-Public ...	82	2(a)	8(b)	76	(a) (1) C.D., Laza in Putao and (2) C. H. Mawlaik in the Upper Chindwin District; (b) 1 Special Dispensary for Women in Maymyo; (2) C.H. Kanbalu in Shwebo; (3) C. H. Pinlèbu in Katha; (4) Yinnabin in Lower Chindwin District; (5) Kindat in Upper Chindwin District; (6) Wundwin in the Meiktila District; (7) Myelat Itinerant Dispensary in Southern Shan States; (8) Sale in Magwe District.
II.—State-Special--	.				
(i) Police ...	41	1(c)	1(d)	41	(c) M.P.H., Mawlaik. (d) M.P.H., Kindat.
(ii) Forests and Surveys	2(e)	...	2	(e) (1) Upper Tenasserim Valley Dispensary and (2) Upper Tavoy Valley.
(iii) Canals ...	2	2	(f) Cheduba Camp.

III.—Local Fund ...	102	...	7(g)	95	(h) (1) Ellen Mitchell Memorial Hospital, Moulmein.
IV.—Private-aided ...	16	1(h)	...	17	(j) Yinnabin in Lower Chindwin District.
V.—Private non-aided	
VI.—Railways ...	27	..	1(j)	26	
Total ...	274	6	18	262	

CLASSES I AND II.—These include all institutions maintained by Provincial Funds and under Government management. The fact that an institution possesses endowments or receives contributions from Local Funds or private subscriptions should not be regarded as a reason for not classing it as "State," so long as Provincial and Imperial Funds are practically responsible for all the charges connected with it. Class I—"Public" are State dispensaries which are open to the poorer classes of the public. Class II are "State" dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III.—Local Fund dispensaries include all institutions which are vested in local boards or Municipalities or guaranteed or maintained by Local or Municipal Funds. The fact that such an institution is aided by private subscriptions, or receives assistance from Government in the shape of part of the salary of the Medical Officer, grants of medicine, or otherwise, should not be regarded as a reason for not classing it as a Local Fund dispensary so long as its existence is practically dependent upon Local Funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guaranteed, but receiving aid from Government or Local Funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers should not be regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries whether maintained by State railways or others.

NOTES.

1. Transfers of dispensaries from one class to another should be noted in the column of "Remarks."
2. Hospitals of the different Funds should be shown as private-aided or non-aided, as the case may be
3. Dispensaries of a purely itinerant character should in no case be included in the statement.

(a) Contribution from Provincial Funds.

* Difference is due to the adding of Rs. 562 being the opening balance of Mawlaik and the omission of Rs. 537 being the closing balance of Budalin, Tilin and B&kpyin.
